Action: «COLLABORATIVE INNOVATION CONSORTIA (CICs) »

Title:

**Integration of cutting edge technologies for the enhancement of Greek quality farm products.
Internet of Food Alliance –InoFA II ΓΤ2CL-0347856**

Description:

Alpha Plan Consultants participates in the Operational Program «**Competitiveness, Entrepreneurship, Innovation**» of the NSRF 2014-2020 under the "**Collaborative Innovation Consortia (CICs)**" co-financed by the European Union and National Resources.

The project titled «**InoFA II**» focuses on the digital transformation of the agrifood supply chain.

Each Work Package constitutes a standalone business plan. It addresses specific needs of the participating enterprises and provides an integrated solution by utilizing and embedding advanced technology into their daily operations. As the participating companies have themselves defined both the problems and the proposed solutions, the project's contribution to the achievement of the expected results is particularly significant. The project is expected to represent a key step towards the digital transformation of the national agrifood supply chain and its transition to a new era, characterized by the adoption of new technologies in the service of sustainability and the advancement of all stakeholders in the agrifood sector.

In full alignment with central European policies, environmentally responsible practices are incorporated into business operations, with particular emphasis on primary production and on operating conditions within an intelligent working environment. All project activities are implemented among members of the Innovation Cluster, who cooperate towards a common objective and the joint development of solutions.

Total Budget: 415.500,14 €

Budget Alpha Plan Consultants: 54.015,39€
